OBJECTIVE

Aspiring Python Full Stack Developer with strong knowledge of Python, Django, MySQL, HTML, CSS, JavaScript, Pandas, NumPy, and RESTful application development. Experienced in Machine Learning and NLP projects through internship and academic work. Seeking an opportunity to contribute to software development, backend engineering, and AI-powered solutions while enhancing technical expertise and delivering high-quality applications.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Web Technologies: HTML, CSS, React.js, REST API

Databases: MySQL

Libraries & Frameworks: Pandas, NumPy, Django, Scikit-learn

AI/ML Concepts: Machine Learning, Deep Learning, NLP, LLM, RAG, Neural Networks (ANN/CNN/RNN), Supervised & Unsupervised Learning

Developer Tools: Git, GitHub, VS Code

Soft Skills: Team Collaboration, Communication, Leadership, Critical Thinking

EDUCATION

Sri Venkateswara College of Engineering & Technology (SVCET)

2022 – 2026

B.Tech | Computer Science & Engineering (AI & ML) | Chittoor

INTERNSHIP EXPERIENCE

Python Full Stack Development Training – Thops Tech Career Solutions Pvt. Ltd.

Mar – Jul 2026

- Completed a 5-month structured training program covering Python, Django, MySQL, HTML, CSS, and JavaScript for full stack web development.
- Built and tested REST APIs and database-driven web modules, applying front-end/back-end integration practices used in production-style applications.
- Practiced end-to-end development workflows — requirement analysis, coding, debugging, and deployment basics — under mentor guidance.

AI | Machine Learning | Deep Learning | NLP Intern – ExcelR Solutions

Jan – Jun 2024

- Completed 200+ hours of structured on-the-job training in ML algorithms, NLP pipelines, and software development workflows aligned with SDLC practices.
- Developed and tested mini-projects covering data preprocessing, model training, and validation; documented processes and maintained project logs for knowledge sharing.
- Collaborated with mentors on debugging and validation activities; participated in team meetings and knowledge-sharing sessions to support project objectives.

PROJECTS

Fake News Detection & Media Integrity Analytics | ML / NLP

2025

- Developed an automated text classification system using Python scripts and TF-IDF vectorization on 10,000+ records, achieving 92% accuracy.
- Applied analytical thinking to compare 3 model configurations, tracking performance metrics (F1-score, precision-recall) and selecting the optimal solution.
- Generated visual reports of credibility scores using Matplotlib & Seaborn, improving issue identification speed by 40% and supporting data-driven decision-making.

Online Shopping Management System | Database Management

2025

- Gathered requirements and designed a relational database with 10+ normalized tables managing customers, products, orders, and payments; documented schema and workflows.
- Wrote and tested complex SQL queries (joins, subqueries, aggregates) to generate operational reports and track issue/order status across the system.

CERTIFICATIONS

- Big Data Analytics | Deloitte — 2025
- Solutions Architecture Job Simulation | AWS via Forage — 2025
- Programming for Data Analytics (Python) | L&T EduTech — 2024
- Data Engineering Foundation | L&T EduTech — 2024
- AI / Deep Learning / NLP | ExcelR Solutions — 2024
